

Are you moving your SAP environment into the cloud?

Redwood is reaching out to organizations that are modernizing their SAP ERP environment by moving to the cloud using the RISE with SAP program.

As your organization moves into the cloud, we want to introduce you to our industry-leading full stack workload automation platform, RunMyJobs. Redwood has been a trusted partner of SAP for more than 20 years. We have the most comprehensive SAP connectors and are the experts at helping you automate your SAP processes and keep your organization running smoothly.

With RunMyJobs, global organizations can:

Connect to any enterprise application in your tech stack

Access our pre-built connectors for all your SAP applications

Orchestrate your cloud and on-premises processes for both SAP and non-SAP processes - all in a single platform

Deploy faster with our no code/low code approach

Be confident that your sensitive data is safe in our ISO 27001 and SOC 2 certified solution

Let us show you how we've helped global leaders like Xerox and Airbus automate their SAP processes.

We can help you too!
